**Natural Roofing Slate: WESTLAND**

**Origin:** Westland is a Brazilian slate quarried from the Minas Gerais area of Brazil.

**Colour:** Grey Green or Graphite.

**Texture and Appearance:** A flat surface with a light texture and heavy dressed edges.

**Quality:** ISS provide Westland slate in a prime quality having been through the most stringent selection process, whilst also being tested to the current British and European requirements.

**Slates Thickness:** In addition to the popular 5-7mm thickness, the Westland is produced in a heavy grade (7-9mm), which is suitable for the northern England and Scottish markets.

This is an extremely popular slate particularly in the South West due to its colour and consistency. Brazilian slate represents great value for money, without compromising on quality or social and environmental responsibility.

**Sizes Available:**

- 600x300
- 500x300
- 500x250
- 400x250
- 400x200
- 350x200
- 300x200

Random widths and diminishing courses can also be supplied as a special order.

*\*Note: Westland Natural slate Ridges and Hips are available to compliment the roofing slates. This, along with our window Sills, fire Hearths and Flooring range in the exact same material could make a beautiful finish to any project.*

**Natural Roofing Slate: ABBEY GREY**

**Origin:** Abbey Grey is quarried in the North West region of Spain.

**Colour:** Light/Mid Grey

**Texture and Appearance:** It has a pronounced texture with traditional dressed edges and is virtually free from visible pyrites.

**Quality:** ISS provide the Abbey Grey slate an ultra (first) quality and prime quality. Having been through the most stringent selection process whilst also being tested to the current British and European requirements.

**Slates Thickness:** In addition to the popular 4-7mm thickness, the Abbey Grey is produced in a heavy grade (7-9mm), which is suitable for the northern England and Scottish markets.

**Sizes Available:**

- 600x300
- 500x250
- 450x250
- 400x200

The Abbey Grey slate is sourced from the North Western region of Spain. It has a pronounced texture with traditional dressed edges and is virtually free from visible pyrites. ISS have marketed this slate for more than 25 years and found it to be an extremely reliable roofing slate, renowned for its durability. It can be laid with total confidence throughout the UK.

**Natural Roofing Slate: PANADERO**

**Origin:** Spain

**Colour:** Blue/Black

**Texture and Appearance:** The Panadero has a textured surface with traditional dressed edges and occasional small inert inclusions, giving this slate a unique character. The quarry where the slate is found produces the highest quality, offering the best test results for the slate performance in the UK environment.

**Quality:** Prime

**Slates Thickness:** 5-7mm

**Sizes Available:**

- 400x200
- 500x250

**Natural Roofing Slate: LUGO**

**Origin:** Lugo is from the North West of Spain.

**Colour:** Light Grey/Green Fleck

**Texture and Appearance:** A smooth textured surface with traditional dressed edges, this slate contains some hints of green in its colour.

**Quality:** ISS provide the Lugo slate in a prime quality, having been through the most stringent selection process, whilst also being tested to the current British and European requirements.

**Slates Thickness:** In addition to the popular 4-7mm thickness, the Lugo is produced in a heavy grade (7-9mm), which is suitable for the northern England and Scottish markets.

**Sizes Available:**

- |         |         |
|---------|---------|
| 600x300 | 400x200 |
| 500x300 | 350x200 |
| 500x250 | 300x200 |
| 400x250 |         |

Random widths and diminishing courses can also be supplied as a special order.

Lugo is a Spanish slate from the north west of Spain; an area which is long established in producing top quality slate products. Light grey in colour with a grey/green hue; it is similar in many respects to the slates quarried in Cornwall and Argentina. The Lugo is a smooth textured slate that is well suited to listed buildings and heritage projects. This slate has proved very popular with many Local Planning Authorities' in the south west and the popularity of the slate is now growing throughout the rest of the UK. ISS have marketed and supplied the Lugo for over 20 years and it has proven itself as a very unique roofing slate that would set your project above all of the rest!

*\*Note: Lugo Flooring Slate and Sills are also available on request.*

### Natural Slate for Flooring, Sills & Hearths

**Origin:** Our slate is sourced from Spain and Brazil.

**Colour:** Dark Grey, Grey Green and Light Grey with Green Fleck (Lugo)

**Texture and Appearance:** Our slates are smooth with a naturally finished surface and straight cut edges.

**Quality:** You are assured of the best quality as our slate undergoes stringent inspections both at the quarry and by the ISS team before distribution.

**Slates Thickness:** Our slates are calibrated to a specified thickness for ease of installation. Available in a variety of thicknesses, lengths and widths to suit most applications.

Here at ISS we are known for our long established relationships with some of the world's finest quarries; particularly in Spain and Brazil, which enables us to provide a consistent supply of high quality products through our national network of roofing and builders merchants.

### Natural Roofing Slate: ZAMORA

**Origin:** Zamora is a Spanish slate from the Galicia region.

**Colour:** Blue/Grey

**Texture and Appearance:** A light textured surface with traditional dressed edges, the Zamora contains some small inert inclusions, which gives a unique character to this quality slate.

**Quality:** ISS provide the Zamora slate in a prime quality having been through the most stringent selection process, whilst also being tested to the current British and European requirements.

**Slates Thickness:** In addition to the popular 4-7mm thickness, the Zamora is produced in a heavy grade (7-9mm), which is suitable for the northern England and Scottish markets.

**Sizes Available:**

- 600x300
- 500x300
- 500x250
- 400x250
- 400x200
- 350x200

A medium dark slate from the Zamora region of Galicia, which is located to the south east of the main producing areas. The Zamora is an easy slate to work with and is particularly suited for complicated roof areas, which require significant amounts of cutting and detailing.

### Natural Roofing Slate: CALEDONIAN

**Origin:** Sourced very high up in the mountains of North Western Spain.

**Colour:** Mid Grey

**Texture and Appearance:** A textured surface with traditional dressed edges.

**Quality:** ISS provide the Caledonian slate in a prime quality, having been through the most stringent selection process, whilst also being tested to the current British and European requirements.

**Slates Thickness:** The Caledonian is produced in 5-7mm and 7-9mm thickness slate which is suitable for the whole of the UK.

**Sizes Available:**

- 500x250
- 400x250
- 400x200
- 350x200

The Caledonian slate is one of fine quality and has been supplied for many years in the UK with a near perfect track record. Sourced from high in the mountains of North Western Spain, this slate is a perfect choice for workability and is virtually free from visible inclusions. The Caledonian slate is a true, top quality slate that has plenty of character, giving a traditional feel to any roof type, whilst lasting the test of time.

### Natural Roofing Slate: CABRERA GREY

**Origin:** Sourced from the North West region of Spain.

**Colour:** Dark Grey

**Texture and Appearance:** A textured surface with traditional dressed edges.

**Quality:** ISS provide the Cabrera Grey slate in a prime quality, having been through the most stringent selection process, whilst also being tested to the current British and European requirements.

**Slates Thickness:** The Cabrera Grey is produced in a heavy grade (7-9mm), which is suitable for the northern England and Scottish markets. A thinner selection of 6-8mm slates, are available for projects where you require a lighter product.

**Sizes Available:**

- 500x250
- 400x250
- 400x200
- 350x200

The quarry from this part of Spain produces a well priced heavy slate for ISS, which is perfect for the northern England and the Scottish markets. The Cabrera Grey is an easy slate to work with, being consistent in thickness and quality with minimal visual pyrite content. ISS have marketed the Cabrera Grey in the northern regions of the UK for several years and this slate has enhanced many new build designs as well as matching in with existing roofs on properties that have required remedial attention. The Cabrera Grey is a great all round slate with a very traditional look.

### Natural Roofing Slate: ARMADA

**Origin:** Spain

**Colour:** Mid Blue Grey

**Texture and Appearance:** The Armada is a mid-Blue grey slate from southern Spain. It is a very flat and uniform slate and has a slight natural texture to its surface with no visual inclusions. Strict quality control and selection process ensures a superior quality slate. This standard of slate makes laying the roof an easy process and the final look simply beautiful.

**Quality:** Prime/Ultra

**Slates Thickness:** 4-7mm 7-9mm and 9-11

**Sizes Available:**

- 400x200
- 400x250
- 500x250

### Natural Roofing Slate: KENSINGTON

**Origin:** The Kensington is quarried in Leon, Spain.

**Colour:** Blue/Black

**Texture and Appearance:** A light textured surface with traditional dressed edges, this slate contains some small inert inclusions, which gives a unique character to this quality slate.

**Quality:** ISS provide the Kensington slate in a prime quality, having been through the most stringent selection process, whilst also being tested to the current British and European requirements.

**Slates Thickness:** In addition to the popular 4-7mm thickness, the Kensington is produced in a heavy grade (7-9mm), which is suitable for the northern England and Scottish markets.

**Sizes Available:**

- |         |         |
|---------|---------|
| 600x300 | 400x200 |
| 500x300 | 350x200 |
| 500x250 | 300x200 |
| 450x220 |         |
| 400x250 |         |

A dark slate with small pyrites, which are stable and guaranteed against oxidation; the Kensington is a good quality mid-price range slate.

This slate is very easy to work with, lending itself to any roof type or design, which is aided by the consistent number of slates in each crate. The Kensington holds ISO-14001 Certification, which demonstrates the high level of environmental responsibility we and our quarry owners adopt.

ISS have been marketing and supplying Kensington slate throughout the UK for over 20 years, proving popular in many coastal areas.
