

International Plywood

## Q-Mark Plywood

“Q-Ply” Structural Quality Panels are designed to give you peace of mind when specifying plywood for walls, roofing and flooring applications. The Q-Mark structural plywood scheme is a third party product certification scheme operated by BM TRADA Certification Ltd. The scheme covers factory production control, documentation and test/assessment evidence, and the resultant certification is specific to clearly defined products and their constituent components. One of the main objectives of the scheme is to provide specifiers, regulators and inspection authorities with the appropriate information for them to identify suitable products for structural use. We can offer Q-Mark panels in 9mm, 12mm, 15mm, 18mm, 22mm and 25mm thicknesses.

Standard sheet size is 2440mm x 1220mm.

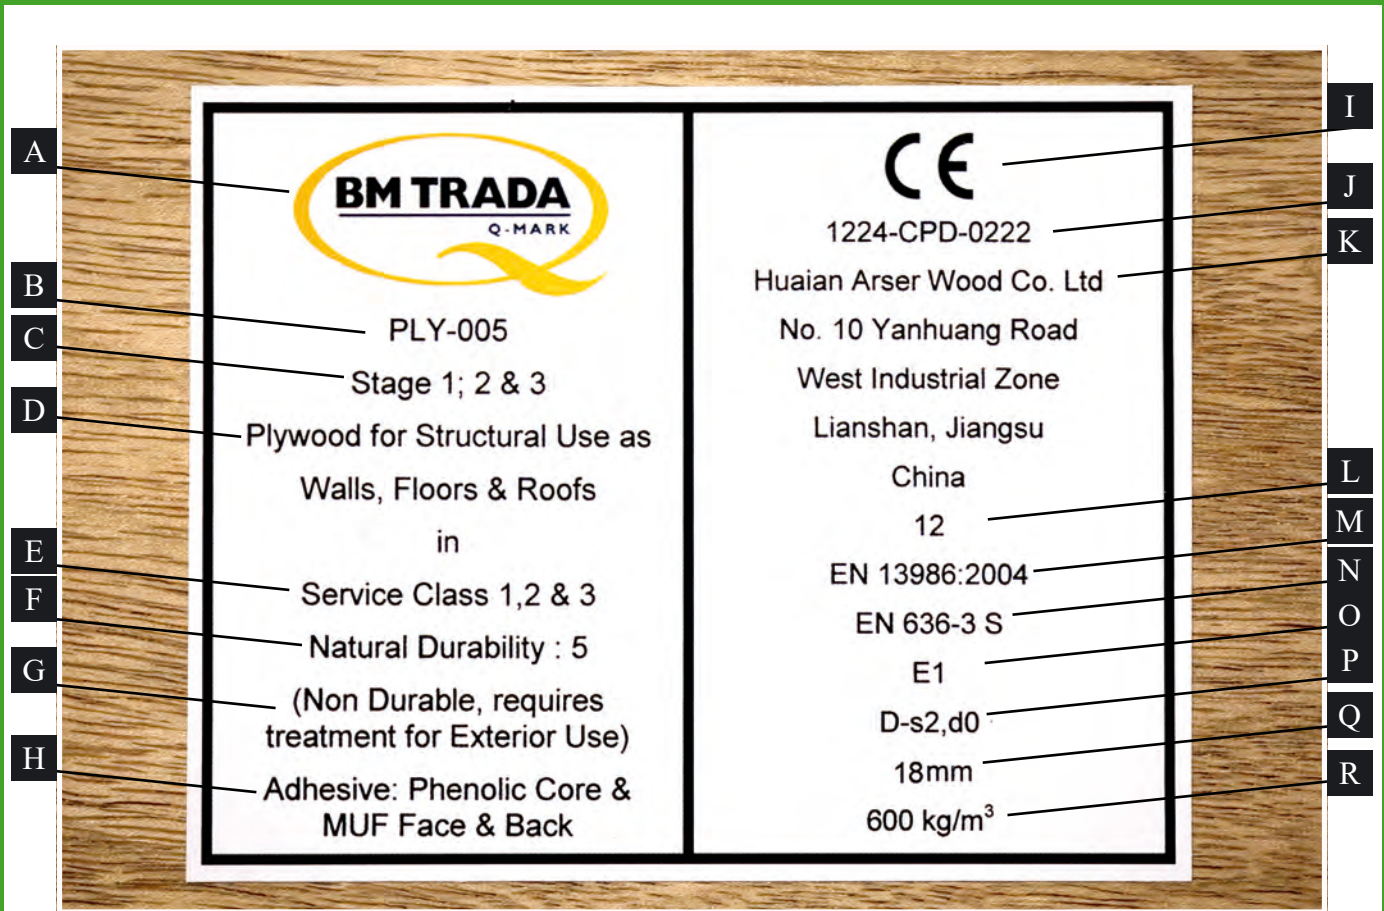

FSC® Certified Q-Mark plywood is also available from stock.

See Page 2 for detailed explanation of label information.
